

HH470 Portable Antenna

Antenna Associates' Model HH470 IFF Antenna brings Identification Friend or Foe (IFF) Antenna portability to a new level. At less than 3 pounds, 8.5 inches wide, 12 inches high and 8 inches deep, this unit is ideal for mounting to hand held weapons or any application where size and weight are critical.

The HH470 IFF Antenna is a two channel IFF (Identification Friend or Foe) Antenna compatible with today's stringent interrogator requirements.

Deployment of the HH470 is simple and can be accomplished with one hand. Storing the HH470 IFF Antenna is simple as well. The active elements fold into the tray assembly which then folds against the weapon's grip stock, protecting the antenna during transport. In its transport configuration the HH470 IFF Antenna is only 2.25 inches thick.

FEATURES

- Simple One Hand Deployment
- Compact Lightweight package
- Durable and Dependable
